Build a comprehensive wiki database for Top Heroes Kingdom Saga covering all core progression systems. Extract and structure granular numerical tables for hero gear sets (Fury of Blood, Titan's Might, Glory of the Knight stats, piece types, enhancement master bonuses at every +10 interval, and Titan Mark faction bonuses), hero star-promotion shard consumption, trait upgrade costs (diamond requirements, 5-level rotation, level 30 max), and epic hero global passive traits (Brawler, Knight, Ranger, Minister, Outlaw bonuses and max level requirements) into a structured markdown database with sortable reference tables

All deliverables are shared. The wiki database is complete.

Summary

I've built a comprehensive progression systems wiki database for Top Heroes: Kingdom Saga, drawing from 19 fetched community sources (Fandom wiki, guidetopheroes.com, topheroes.info, topheroestier.com, atwiki.jp, LootBar, and multiple Reddit threads).

The main markdown document covers:

- **Gear sets** — Fury of Blood (+160% Gear HP, +6% Damage Reduction), Glory of the Knight (+40% ATK, +80% HP, +8% Skill Damage Amplify), Titan's Might (+80% ATK, +6% Damage Increase), plus a per-hero recommendation table for all 46 heroes
- **Enhancement Master bonuses** — flat-stat tier ladder (Rare Lv10: 700 ATK/7,000 HP through Mythic: 44,500/949,000) and a separate percentage ladder (+10/+20/+30/+40/+50 = 10/25/50/100/200%), with per-piece level rewards
- **Titan Marks** — +30% of total gear stats when worn by a same-faction hero
- **Star promotion** — full per-star shard tables for all 4 rarities (Epic/Legendary: 500 total, Mythic: 1,000), plus awakening costs (345 shards, 9 soul stones)
- **Traits** — max level 30, 5-level rotation, 10 shards per level, 1,160 total to max all 4 traits, diamonds to unlock level 1

- **Epic passives** — Brawler/Knight/Ranger/Minister/Outlaw all max at +30% at trait level 30, unlocking at 2-star Platinum

Ten companion CSVs are provided for sorting and filtering. All arithmetic was verified (band sums, cumulative totals, awakening totals), all values are inline-cited to their sources, and unresolved data (trait diamond amounts, some terminology relationships) is clearly marked as gaps rather than guessed. Where sources conflict (e.g., Fandom vs. Cost Tables on Mythic band-3 per-star costs), both are preserved with the discrepancy flagged.
